

RevSpring Arrived™

Parking Lot Waiting
Room Application

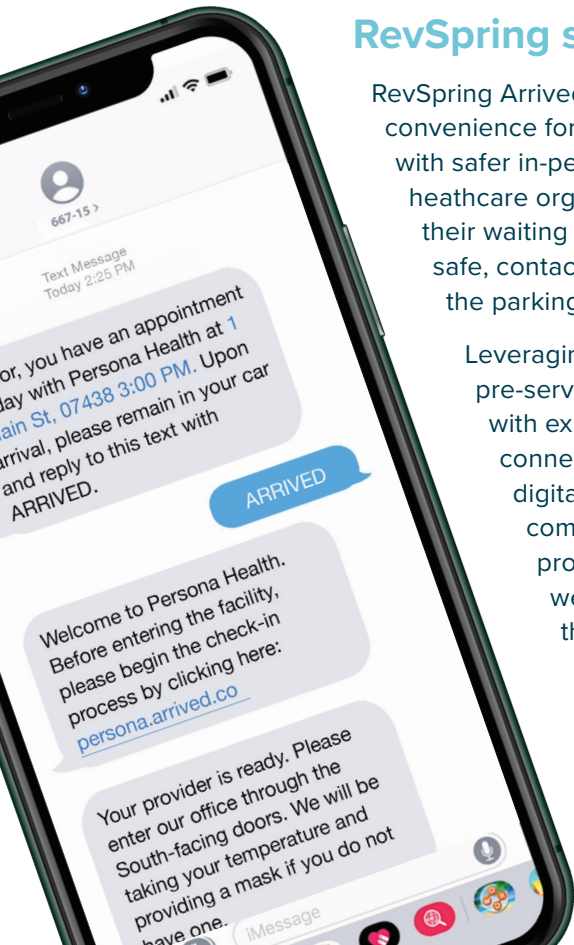

RevSpring Arrived™ solves shorter-term concerns associated with COVID-19 check-in protocols and processes by facilitating remote check-in from the parking lot—but down the road, the same processes can be used from the comfort of the patient's home or to maintain contactless solutions in your physical waiting room.

RevSpring solves the market pain

RevSpring Arrived™ gives you check-in-anywhere convenience for providers and their patients, along with safer in-person interactions for everyone. As healthcare organizations open their doors but not their waiting rooms, digital innovation enables safe, contactless check-in and payments from the parking lot—and beyond.

Leveraging RevSpring robust tools for pre-service and patient access combined with expertise in patient billing, Arrived™ connects patients and front office staff digitally, with easy-to-use check-in communications and co-payment processing to safely and efficiently welcome and prepare patients for their appointments.

Create your virtual waiting room today for a contactless approach to patient intake and payment collection.

Features & Benefits

- **Check-in-anywhere convenience** for providers and their patients, along with safer in-person interactions for everyone
- A digital solution that **flexes with your practice** as needs and policies evolve
- **Quick and flexible implementation** to reduce physical contact between patients and staff during the current pandemic
- **Streamlined check-in process** with standard form questions and co-payment prompts
- A balanced combination of **hands-off automation and human-touch personalization**
- **Integrates** with RevSpring's appointment reminders and payment solutions
